VIEWSAT™ MONITOR & CONTROL SOFTWARE

ViewSAT™ is a monitor and control application designed to bring simple remote terminal operation through the use of an intuitive Graphical User Interface (GUI). It is specifically designed to monitor and control GCS' Hawkeye™ and Hawkeye II™ and Cheetah™ series of VSAT terminals. The monitor and control is provided for the embedded iDirect™ modem, Antenna controller and some select BUC/SSPAs.

System Features:

- Single button operation of both modem and ACU acquisition functions
- Simple multiple satellite network switching
- Terminal status tree indicator group
- User assembly and setup prompting
- Intelligent troubleshooting pop-up windows
- Satellite visibility coordinates and pointing aids
- Real time SNR metering and transmit power incrementing
- Real time LAN IP subnet monitoring
- Simplified device configuration and option file control
- Manual GPS and coordinate locator tools
- SSPA M&C
